

## Male Patient Questionnaire & History

Name: \_\_\_\_\_ Today's Date: \_\_\_\_\_  
(Last) (First) (Middle)

Date of Birth: \_\_\_\_\_ Age: \_\_\_\_\_ Weight: \_\_\_\_\_ Occupation: \_\_\_\_\_

Home Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

Best Contact Number: \_\_\_\_\_ Alternate #: \_\_\_\_\_

E-Mail Address: \_\_\_\_\_

In Case of Emergency Contact: \_\_\_\_\_ Relationship: \_\_\_\_\_

Cell Phone: \_\_\_\_\_ Work: \_\_\_\_\_

Primary Care Physician's Name: \_\_\_\_\_ Phone: \_\_\_\_\_

Address: \_\_\_\_\_  
Address City State Zip

Marital Status (check one): ( ) Married ( ) Divorced ( ) Widow ( ) Living with Partner ( ) Single

Number of children: \_\_\_\_\_

Please list your TOP 3 unwanted symptoms/health concerns:

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

Please circle the services (as many as apply) you are interested in hearing about at our clinic:

Weight Loss      Nutrition      Hormone Balance/BioTE      Pain/Inflammation Reduction

Stress Support      Digestive Support      Lab Work / Food Sensitivity Testing      Red Light Therapy

Allergy Elimination with Laser      Neurofeedback      Chiropractic      Massage therapy

## Health Intake

**Nutritional/Vitamin Supplements:** \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Digestion/Elimination:** Check any: ( ) I have a normal bowel movement daily ( ) I have two or more BMs daily  
( ) I don't eliminate every day ( ) I have less than 2 BMs weekly ( ) I eliminate daily, but loose/watery  
( ) I use laxatives ( ) I have heartburn / acid reflux / GERD ( ) I experience gas /discomfort/bloating  
( ) I have/had hemorrhoids

**Weight/Body Composition:** Check one: ( ) I am content with my body and weight currently  
( ) I want to lose \_\_\_\_ lbs. ( ) I want to gain \_\_\_\_ lbs. ( ) I am using or have used methods to control my weight

**Physical Activity:** \_\_\_\_ Low/Sedentary (spend more time sitting/driving than walking/exercising)  
\_\_\_\_ Moderate (average mix of exercise/activity) \_\_\_\_ Active (work out 5-7 days weekly for 30 min. or more)  
Exercise routine if applicable \_\_\_\_\_

**Daily Habits: Check any/all that apply:**

- ( ) I eat only when I'm hungry ( ) I eat 3-5 small meals daily ( ) I skip meals unintentionally
- ( ) I over eat unconsciously ( ) I don't really think about eating; it just happens ( ) No matter how much I eat I am never full ( ) I eat foods I know don't agree with me/knowing I'll feel uncomfortable after eating them
- ( ) I eat when I'm sad or stressed or anxious ( ) I eat secretly ( ) I want to improve my eating habits
- ( ) I drink regular soda \_\_\_\_ daily \_\_\_\_ weekly \_\_\_\_ rarely \_\_\_\_ never
- ( ) I drink diet soda \_\_\_\_ daily \_\_\_\_ weekly \_\_\_\_ rarely \_\_\_\_ never
- ( ) I drink energy drinks (i.e., red bull, celsius, monster) \_\_\_\_ daily \_\_\_\_ weekly \_\_\_\_ rarely \_\_\_\_ never
- ( ) I drink coffee \_\_\_\_ cups daily ( ) I don't drink coffee ( ) I smoke or use nicotine \_\_\_\_ yes \_\_\_\_ no
- ( ) I drink alcoholic beverages \_\_\_\_ number of drinks weekly \_\_\_\_ I only drink socially/rarely
- ( ) I choose not to drink alcohol ( ) I am a recovering alcoholic (sober since \_\_\_\_)
- ( ) I drink water: \_\_\_\_ less than 3 cups (24 oz) daily \_\_\_\_ 3—7 cups daily \_\_\_\_ 8 cups + daily
- ( ) I use THC \_\_\_\_ yes \_\_\_\_ no If yes, what form and how much (daily, weekly...) \_\_\_\_\_
- ( ) I drink or use dairy (milk, skim milk, yogurt, cheese, butter, creams, ice cream) \_\_\_\_ yes \_\_\_\_ no
- ( ) I crave: \_\_\_\_ salty foods \_\_\_\_ sweets \_\_\_\_ bread/pasta/beer \_\_\_\_ caffeine \_\_\_\_ alcohol \_\_\_\_ dairy

**Known or Suspected Allergies or Food Sensitivities:** \_\_\_\_\_

- ( ) I have been diagnosed with or suspect yeast overgrowth/candida ( ) I battle sinus/allergy or asthma

## Medical History

Any known drug allergies: \_\_\_\_\_

Have you ever had any issues with anesthesia? ( ) Yes ( ) No

If yes, please explain: \_\_\_\_\_

Medications with dosing: \_\_\_\_\_

Current Hormone Replacement Therapy: \_\_\_\_\_

Past Hormone Replacement Therapy: \_\_\_\_\_

Surgeries, list all and when: \_\_\_\_\_

I have completed my family \_\_\_ yes \_\_\_ no

Other Pertinent Information: \_\_\_\_\_

I understand that if I begin testosterone replacement with any testosterone treatment, including testosterone pellets, that I will produce less testosterone from my testicles and if I stop replacement, I may experience a temporary decrease in my testosterone production. Testosterone Pellets should be completely out of your system in 12 months. By beginning treatment, I accept all the risks of therapy stated herein and future risks that might be reported. I understand that higher than normal physiologic levels may be reached to create the necessary hormonal balance.

## Testosterone Pellet Insertion Consent Form

Bio-identical testosterone pellets are hormone, biologically identical to the testosterone that is made in your own body. Testosterone was made in your testicles prior to “andropause.” Bio-identical hormones have the same effects on your body as your own testosterone did when you were younger. Bio-identical hormone pellets are plant derived and bio-identical hormone replacement using pellets has been used in Europe, the U.S. and Canada since the 1930’s. Your risks are similar to those of any testosterone replacement but may be lower risk than alternative forms. During andropause, the risk of not receiving adequate hormone therapy can outweigh the risks of replacing testosterone.

### **Risks of not receiving testosterone therapy after andropause include but are not limited to:**

Arteriosclerosis, elevation of cholesterol, obesity, loss of strength and stamina, generalized aging, osteoporosis, mood disorders, depression, arthritis, loss of libido, erectile dysfunction, loss of skin tone, diabetes, increased overall inflammatory processes, dementia and Alzheimer’s disease, and many other symptoms of aging.

**CONSENT FOR TREATMENT:** I consent to the insertion of testosterone pellets in my hip. I have been informed that I may experience any of the complications to this procedure as described below. **Surgical risks are the same as for any minor medical procedure.**

### **Side effects may include:**

Bleeding, bruising, swelling, infection, pain, reaction to local anesthetic and/or preservatives, lack of effect (typically from lack of absorption), thinning hair, male pattern baldness, increased growth of prostate and prostate tumors, extrusion of pellets, hyper sexuality (overactive libido), ten to fifteen percent shrinkage in testicle size and significant reduction in sperm production.

There is some risk, even with natural testosterone therapy, of enhancing an existing current prostate cancer to grow more rapidly. For this reason, a prostate specific antigen blood test is to be done before starting testosterone pellet therapy and will be conducted each year thereafter. If there is any question about possible prostate cancer, a follow-up with an ultrasound of the prostate gland may be required as well as a referral to a qualified specialist. While urinary symptoms typically improve with testosterone, rarely they may worsen, or worsen before improving. Testosterone therapy may increase one’s hemoglobin and hematocrit, or thicken one’s blood. This problem can be diagnosed with a blood test. Thus, a complete blood count (Hemoglobin and Hematocrit.) should be done at least annually. This condition can be reversed simply by donating blood periodically.

### **BENEFITS OF TESTOSTERONE PELLETS INCLUDE:**

Increased libido, energy, and sense of well-being; increased muscle mass and strength and stamina; decreased frequency and severity of migraine headaches; decrease in mood swings, anxiety and irritability (secondary to hormonal decline); decreased weight (increase in lean body mass); decrease in risk or severity of diabetes; decreased risk of Alzheimer’s and dementia; and decreased risk of heart disease in men less than 75 years old with no pre-existing history of heart disease.

On January 31, 2014, the FDA issued a Drug Safety Communication indicating that the FDA is investigating risk of heart attack and death in some men taking FDA approved testosterone products. The risks were found in men over the age of 65 years old with pre-existing heart disease and men over the age of 75 years old with or without pre-existing heart disease. These studies were performed with testosterone patches, testosterone creams and synthetic testosterone injections and did not include subcutaneous hormone pellet therapy.

I agree to immediately report to my practitioner’s office any adverse reactions or problems that may be related to my therapy. Potential complications have been explained to me and I agree that I have received information regarding those risks, potential complications and benefits, and the nature of bio-identical and other treatments and have had all my questions answered. Furthermore, I have not been promised or guaranteed any specific benefits from the administration of bio-identical therapy. I certify this form has been fully explained to me, and I have read it or have had it read to me and I understand its contents. I accept these risks and benefits and I consent to the insertion of hormone pellets under my skin. This consent is ongoing for this and all future insertions.

I understand that payment is due in full at the time of service. I also understand that it is my responsibility to submit a claim to my insurance company for possible reimbursement. I have been advised that most insurance companies do not consider pellet therapy to be a covered benefit and my insurance company may not reimburse me, depending on my coverage. I acknowledge that my provider has no contracts with any insurance company and is not contractually obligated to pre-certify treatment with my insurance company or answer letters of appeal.
